

Canada ELD mandate features

Stay compliant with our reliable, easy-to-use ELD certified for use across Canada and the U.S. Motive is fully certified on both Android and iOS for the Canadian ELD mandate.

Canada features

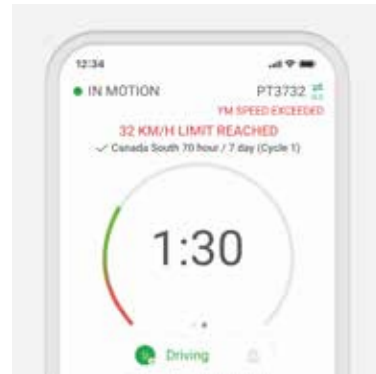

Deferral of hours

Drivers operating under the Canada South Cycle can defer up to two hours of their required daily off-duty time to the next day.

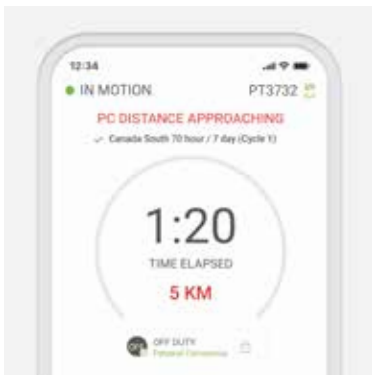

Cycle switch limit

Drivers won't be able to switch between Cycle 1 (7 days) and Cycle 2 (14 days) unless they've taken the required off-duty time.

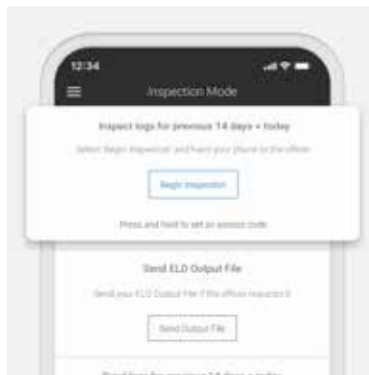

Yard move limit

ELDs will automatically switch to driving status once a driver has exceeded the 32 km/h (speed) yard move limit.

Personal conveyance limit

ELDs will automatically switch to driving status once the driver has exceeded the 75 km (distance) personal conveyance daily limit. Once exceeded, drivers will have to wait until the next day to use personal conveyance again.

Canadian output file

Drivers can easily share logs with officers during roadside inspections.

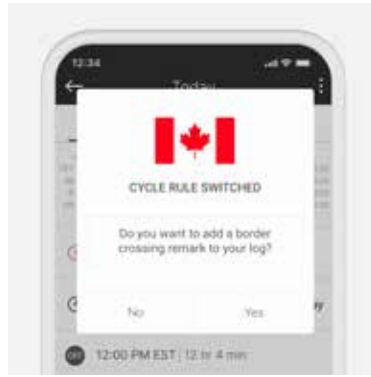

Vehicle connection prompts

Drivers receive in-app notifications when their Driver App isn't connected to the vehicle or when Bluetooth connection is lost.

Canada South Cycle off-duty clock

Drivers operating under the Canada South Cycle can use the off-duty clock to keep track of their daily 10-hour off-duty requirement.

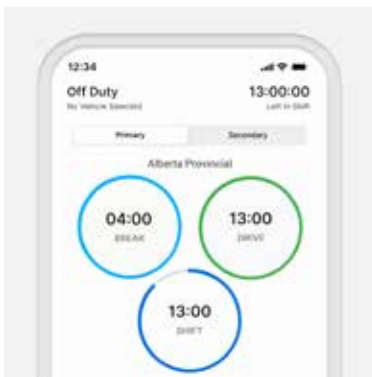

Automatic CA/U.S. cycle switch

The Driver App automatically switches from Canadian to U.S. rules — and vice versa — at the border for a seamless HOS transition.

French language support

The Motive Driver App, Fleet App, and Fleet Dashboard are available in Canadian French.

Alberta Provincial cycle

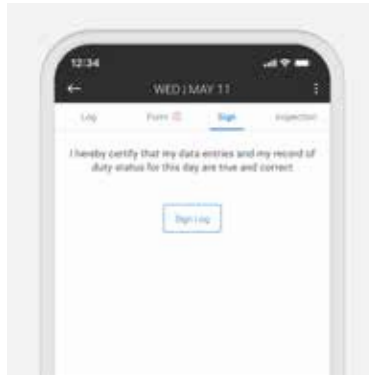

Fleets operating solely in Alberta can manage their HOS and stay compliant with Alberta provincial rules.

Canada and U.S. features

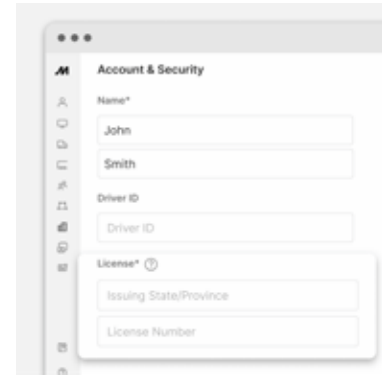

Undo misclaimed trips

Drivers can undo unidentified trips claimed in error, allowing managers to reassign to the correct driver.

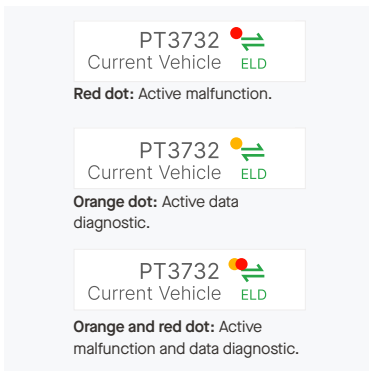

Recertify logs

To remain in compliance, drivers are prompted to re-certify their logs if edits are made.

Required driver fields

Fleet admins can easily fill out required driver licenses and state jurisdiction when creating a new driver account.

Malfunction and diagnostic messages

Identify when an ELD has active malfunctions or data diagnostics and how to resolve the issue to stay compliant.
